Inside the L.C. Bates Museum

Summer Camps Excite Young Naturalists

In Balance / Imbalance Exhibit Features Maine Artists

Saturday, May 6th, 4 PM
In Balance / Imbalance Opening Reception

Life is about balance. Far from being static, balance in nature is achieved through dynamic processes. Balance involves circulation, exchange, regulation, and negotiation, it also involves diversity and creativity.

In Balance/ Imbalance is the result of a collaborative effort between the L.C. Bates Museum staff and two Colby College students, Zehra Gundogdu and Anna Jaubert, under the supervision of Professor Véronique Plesch.

John Meader delivered his work, Weeping Ice, a Warm Winter Day, monotype on paper, 37 x 30 in, 2022, for inclusion in the summer exhibit.

Albino Porcupine
According to the Maine Department of Inland Fisheries and Wildlife, there’s about a 1 and 10,000 chance of a porcupine being born albino. Seeing one out in nature is not likely. But when you visit the

Newsletter Nature Fact
The museum will host a free Object Care and Storage workshop on Wednesday, June 7 with conservator Ron Harvey. It will start at 9:30 and run until 3 PM. Please call the museum to register for the event.

The museum is pleased to have received donated support to continue to address the masonry needs of the historic 120 year old Romanesque Revival building.

Fun games were played by the children at Good Will. Does anyone know what game the boys are playing? Photo from the Good Will Hinckley Archives.

Recently Donated Bobcat Mount

A wonderful bobcat mount was recently donated to the museum’s natural history collection. This specimen from the area will support learning about regional mammals and different taxidermy presentations.

Museum Summer Camps are Back

Come Explore Our Natural World With Nets in Hand

Nature Camp

Spring Wildflowers are in Bloom

Walk the Good Will Hinckley Trails to see trillium and other native plants in flower.

All are invited to visit the Bird Gallery to draw or paint the many amazing specimens of birds. You can select a bird you like to paint that might have a unique bill, striking colors or sharp talons.

Museum Volunteers

Come join the museum team and help provide educational activities and events for visitors from our community.

Museum News

The museum is not likely. But when you visit the museum you can view a taxidermy mount and learn about albino porcupines.

**May Museum Activities For Families and Children**

**Saturday, May 6, 9:30 AM**  
**Jane’s Walk ME—Explore History on the GWH Campus**  
As part of Jane’s Walk take a walking tour of the museum’s architecture and the GWH campus near the museum including buildings, the road and pond behind the museum. We will talk about the Maine architect William Miller of Lewiston, who designed the museum and 4 other buildings on campus and Parker of Olmsted Firm’s design of the road and pond. Jane’s Walk is a global festival of free, walking conversations inspired by community activist Jane Jacobs. Jane’s Walks combine the simple act of exploring a place with personal observations, local history, and civic engagement.

**Saturday, May 6th, 4 PM**  
**In Balance / Imbalance**  
Opening Reception for the museum’s summer art exhibition. Come see the wonderful exhibit and talk with the artists and curators.

**Saturday, May 13th, 10 AM**  
**Mammal Day!**  
What do humans, bears, whales, and bats have in common? Quite a lot, it turns out! We will talk about what makes a mammal a mammal, and the adaptations we can observe in a mammal’s fur, teeth, and feet to find out who they are, and what they’re good at! Skulls and pelts will be available to touch, so get a real close look at mam-mal adaptations. Make a mammal craft to take home.

**Saturday, May 20th, 10 AM**  
**NISE Earth and Space Activities**  
EARTH And Space NASA Camp  
July 17-21st

Dig Into the Past -History Camp  
July 5-7th  
Eco Exploration!  
July 10-14

Please call or email the museum for more information about camps or to register your child for a memorable museum experience.
NSE Earth and Space Activities
Come learn about some of the techniques used by NASA scientists to explore and understand our universe, through a series of fun and informative hands-on activities, including: Stomp Rockets * Mars Rover Game * Discovering Distant Planets * Moon Craters * and more! Plus, discover the construction and principles behind a working refractor telescope with the GALILEOSCOPE!

Saturday, May 27th, 1pm - 2:30pm
Audubon’s Revenge
Let your imagination run wild as we invent fantastic new creatures by combining parts of existing animals in the museum—using colored pencils, of course! This fun activity helps kids think about adaptations and the “creativity” we observe in some animals’ naturally selected traits. Can you invent a chimera stranger than the duck-billed platypus?

Summer Hours
May to November Wednesday, Thursday, Friday and Saturday 10 AM to 4:30 PM
Or by appointment
Saturday Morning Programs at 10 AM

Adults $4.00 Youth Under 18 $1.00
Group Rates

Call or email the museum to set up a group or school program.
